

Alert Point

Stand alone alarm system.

The Alert Point is an aesthetically pleasing, fully featured stand alone alarm system. Powered with a 9v PP3 alkaline battery, the Alert Point includes an integral sounder and resettable call point.

Manufactured from tough polycarbonate, the Alert Point is designed for use in industrial, commercial and retail applications as well as portacabins, car parks, churches and holiday parks. It also incorporates a tamper switch to prevent unauthorised removal or misuse.

The Alert Point can be used for a wide variety of applications such as Fire, Intruder, Panic, Evacuation, Assist or General alarm.

Once activated the Alert Point will emit a 102 dB alarm, an activation flag drops in to view and the built in LED facility flashes red. Any external connected devices will be activated. The Alert Point can be easily reset with a special key, ensuring that the unit is quickly operational again. An override facility can silence the alarm until the Alert Point can be reset.

The Alert Points can be interconnected and have the ability to monitor each other to create a network of protection. A 12/30vdc external power connection is incorporated in the Alert Point to support external devices such as sounders and strobes. With an easy, 4-screw, wire-free installation, this versatile product is the ideal solution for establishments that have a requirement for a simple, but effective alarm system.

Features

- * Stand alone, self contained alarm system.
- * No wiring involved, simple 4 screw installation
- * Integral resettable call point, simple key to reset, no broken glass or parts to replace
- * Low battery warning, provides a 15 month stand-by life
- * Can be linked to sounders, strobes, call points & detectors
- * Can be interconnected and monitored, creates a network of protection
